Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. (See line 1-2).

-Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoo (U.S. 5624460). Regarding **claim 1**, Yoo teaches an acupuncture needle

Art Unit: 3731

(fig.1) noted in col. 2, lines 1-2, said needle having a fine point (12, fig.1), and a tube type grip element (3, figure 1).

Regarding **claim 2**, Yoo teaches the grip element having a cylindrical outer surface (3, figure 1).

Regarding **claim 3**, Yoo teaches a tube type grip element compressed along an entire length of the acupuncture needle (figure 2) as noted in col. 2, lines 4-8.

Claims 1-2 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Yoo, Tae-Uoo (20-0296982). Yoo, Tae-Uoo discloses the same structure as the applicant. Specifically, Yoo, Tae-Uoo discloses an acupuncture needle (1, fig. 1), a fine point (11, fig.1), a tube type grip element (20, fig. 1), and the grip element having a cylindrical outer surface (20, figure 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 3731

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoo, Tae-Uoo (20-0296982) in view of Yoo (U.S. 5624460).

Yoo, Tae-Uoo discloses the invention substantially as claimed except for the tube type grip element to be compressed along entire length of said acupuncture needle.

However, Yoo ('460) teaches the tube type grip element (3, fig.1) to be fixed to the entire acupuncture needle so that it will not move (col. 2, lines 4-8). Although Yoo ('460) discloses that this is for carrying purposes, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to bind the grip element to the entire length of the needle to reduce shakiness of the needle in order for more accurate operation.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toyama (U.S. 3905375); Churchill (U.S. 6423014B1); Toreillo (U.S. 3976078).
